Production: Fair 2-3 week

Bird Size: 8 pounds

Broody: yes

Hardiness: cold tolerant

Personality: Docile - Friendly

Cochins are known for their very soft feathers and fluffy appearance. They have a profusion of long, soft plumage that makes them seem larger than they actually are. Our standard-size cochins are available in four varieties: white, blue, silver laced, and partridge. (Blue fowl will produce offspring that are also black and splashed.) Feather-legged.
