It is also known as **Golden Comet**, **Golden Sex Link**, **Cinnamon Queen**, and **Red Star**. This Hybrid strain is a leader in the brown egg market and is by far the most popular bird we sell. Customers favor this bird for its large eggs and quiet temperament. These birds are sex-Linked, which means the sex of the chicks can be determined by their color when they hatch. Mature hens have a soft buff- red color and roosters are white with darker wing, neck and tail feathers.
